

## WCM - A holistic model to transform enterprises

The world class manufacturing (WCM) model is an applied and tested model for transforming enterprises. It visually represents the key components and their linkages for good governance and sustainable superior manufacturing performance. It focuses on achieving world class levels of QCDIP.

This four tier model holistic model engages all levels of management in an all-encompassing manner to innovate and transform its manufacturing. In its implementation, it combines both top-down and bottom-up approaches. The application of this model transforms an enterprise making it productive, responsive, innovative and market driven. The enterprise is geared towards achieving zero losses, delays, defects, accidents, breakdowns and pollution.
