Dear Dr Ajit Singhvi

Greetings from the IIT Roorkee

I have browsed through the book, "Fast tracking to Managerial and CEO Roles".

The over view of 277 topics on management and transformation, in user friendly manner, will surely help the reader including my Phd and other students, acquire competencies to manage and improve inputs, processes and deliveragbles, at an early age in their careers. We need more people wtih knowledge and skills to complement their technical abilities, and be able to commercilase the creative ideas and processes that we invent here. We will also, thus, be able to set up and manage large corporations in defence and civil field like many other countries.

I have found the book to be fascinating and stimulating at the same time.

I wish all the best.

Sincerely,

(Dharmendra Singh)
